Graphics: NVIDIA GeForce GTX 1050

DirectX: Version 11

Sound Card: DirectX compatible soundcard or onboard chipset

English,French,Italian,German,Japanese,Korean,Russian,Traditional Chinese

soulcalibur vi - dlc 3 character creation set a

Was looking forward to trying this game out, unfortunately it isn't very good. Early access, I'm ok with that, but the combat system is awful. After killing a few minor enemies you encounter a "scorpion" creature with a LOT of health and your inept character isn't up to the task with the clumsy combat system. You have a companion who just stays in the background, no help whatsoever so you're left to fight this creature alone, good luck to anyone who beats it. I don't have the patience to run in circles hitting the creature and causing very little damage, you could be there for a week. Another issue is the clipping through rocks and the grass textures are not on the ground. High hopes were quickly dampened. Refunded. Here's a video I streamed on twitch, quality not great but you'll get the overall impression.

<https://youtu.be/vtPWkJVTNS8>. Duration: Main Campaign 15 hours to 3-star each level.

[This was an enjoyable casual word-making game. There are a number of special abilities and special tiles which add variety and strategy to your word-making. Most levels were fairly easy to 3-star, but some were dastardly.](#)

[In addition, there are "banana challenges" to work through which require you to win the level and do something special, like spell a 5+ letter palindrome.](#)

[7/10. The best game. Total Sellout to Epic.. The vr version is really not that great. A lot of framedrops while all other games run fine for me on top of bad interactions with objects / puzzles. Can't recommend.. Worst game you will ever find.. Very enjoyable game, with some interesting plot. I have played all 4 games in the series and they have got better each time!. This has been untouched in my library for years. I don't really know why anymore, now that I've gone through it I know everything's there and it's all pretty damn good!](#)

[The setting is a little bit cliché \("magic" vs. science\), but everything from the writing to the art just works and the story wasn't at all what I expected after the first chapter or so.](#)

[So yeah, already bought the sequel.](#)

The whole point of this game is to play multiplayer, and the multiplayer just doesn't work. Both me and a friend tried playing together and it was just impossible. The design looks great, but this game is just a \$11 menu screen. Probably the last early access VR game I buy thanks to this monstrosity.. Not a bad little racer! Colorful, sharp graphics (though shadows seemed to be bugged) and catchy, simple music/sound effects. The controls are quite easy to manage, so it would be a great first racing game for kids.

I bought it on a whim, so I'm pleased that it actually ended up being a decent title.. Who doesn't want a singing zombie waifu? Who also has noice butt.
+1.

11/10. Awful game.

There is no goal, no mission, no nothing. You get dropped into a poorly made gameguru map, and you shoot fish until you get bored of it. That's it.

. This game makes Bad Rats look like a triple-A title. Cute, short little route from the main game series with a new love interest. Even at full price, it's head and shoulders above every other 'anime' 'visual novel' game on steam at this price point. Definitely worth a read.. Couldn't get past level 3, maybe bugged or too high an IQ for me to complete, who knows. This game is a nice gameplay. The developer doesn't improve of broken achievement and trading cards. These cards I don't receive. Please fix them as fast as you can possible.
