

[Samsung Altair 30 R 1.04 Motherboard Driver](#)

Computing

able dictionary of acronyms, jargon, ages, tools, architecture, operating systems, conventions, standards, mathematics, is, institutions, computers, projects, in fact anything to do with computing.

This Dictionary is Copyright Dennis Howe 1993, 1997.

Permission is granted to make and distribute verbatim copies of this dictionary or modified versions or translations into another language, provided that every such copy or derived work carries the above copyright notice and is distributed under terms identical to these. Individual definitions from this dictionary may be used without restriction provided no more than twenty are used in any one work.

Please refer to the dictionary as "The Free On-line Dictionary of Computing, <http://www.ford.cba.uak.ac.uk/>, Editor Dennis Howe" or similar.

The dictionary has been growing since 1993 and now contains over 11000 definitions totaling more than four megabytes. Entries are cross-referenced to each other and to related resources elsewhere on the net. It services around 5000 queries per day.

Where (LaTeX) commands for certain non-ASCII symbols are mentioned, they are described in their own entries. "P" is also used to represent the Greek lower-case lambda used as (lambda-calculus). Cross-references to other entries look like this: Note that not all cross-references actually lead anywhere yet, but if you find one that leads to something inappropriate, please let me know. Dates after entries indicate when that entry was created, updated or first date-stamped. They do not imply that it was up-to-date at that time.

You can search the latest version of the dictionary by (WWW) ([URL: http://www.ford.cba.uak.ac.uk/](http://www.ford.cba.uak.ac.uk/)). If you find an entry that is wrong or inadequate please let me know.

See (Permissions) for how to interpret the permissions given for some entries.
